# Farm-to-School

## Farm-to-School Program

By CKCDUSER, 20 MAY, 2011, No Comment

Created by the Washington State Legislature in the Local Farms-Healthy Kids Act of 2008, the Washington State Department of Agriculture's Farm-to-School Program is dedicated to fostering relationships between schools and agricultural producers in the state. Their goal is to support expanding economic opportunities for farmers while educating students about the connections between food, farming, health, and the environment. The program provides information, inspiration, assistance, and policy solutions for those working to supply healthy, Washington-grown food and related education to youth in our state. Partners include the Small Farm & Direct Marketing Program, the Office of the Superintendent of Public Instruction, WSU Small Farms Team, and various commodity commissions.

For more information on the Farm-to-School Program, phone (206)256-6151, visit [www.agr.wa.gov/farmtoschool](http://www.agr.wa.gov/farmtoschool), or e-mail [FarmtoSchool@agr.wa.gov](mailto:FarmtoSchool@agr.wa.gov).

# Water on Wheels

Water on Wheels

Water on Wheels (WOW) offers FREE lessons for Kindergarten through high school public and private schools, and informational presentations at community events throughout eastern Washington.

WOW lessons include level hands-on demonstrations, educational games, and grade-level materials to help give students a better understanding of water, soil and energy conservation. Teachers are able to have just one lesson or a series of conservation-minded lessons presented over a period of time.

In partnership with the Franklin Conservation District, WOW lessons were provided to 404 students and 35 teachers in the Zillah, Sunnyside, Grandview, Outlook, Granger, Wapato, and Mabton school districts for the 2010-2011 school year.

For more information on WOW contact Franklin Conservation District
